

SCANNING SCHEDULE & SCOPE

Vulnerability Management Program

Date: June 19, 2026 | Version: 1.0

1. Scope Definition

Target Scope

Asset	IP Address	Scan Type	Frequency
MSF-01	192.168.1.6	Credentialed + Unauthenticated	Weekly

Scan Configuration

Parameter	Setting
Port Range	All ports (1-65535)
Protocols	TCP, UDP
Scan Types	Discovery, Vulnerability Assessment, Web Application
Authentication	SSH Credentials (msfadmin/msfadmin)
Exclusions	None

Scan Templates

Template	Purpose
Basic Network Scan	Discovery & Port Scanning
Advanced Scan	Deep vulnerability assessment
Web Application Scan	HTTP/HTTPS testing

2. Scanning Schedule

Recurring Schedule

Scan Type	Day	Time	Assets	Deliverable
Full Vulnerability Scan	Monday	08:00 AM	MSF-01	Weekly Report
Quick Discovery Scan	Wednesday	02:00 PM	MSF-01	Quick Status
Post-Patch Validation	As Needed	After Remediation	MSF-01	Validation Report

On-Demand Scans

Trigger	Action	Priority
New Vulnerability Disclosed	Immediate Scan	CRITICAL
Patch Applied	Validation Scan	HIGH
Configuration Change	Security Review	MEDIUM

Confidential - For Internal Use Only
